**SECTION 1: Identification of the substance/mixture and of the company/undertaking**

- **1.1 Product identifier**

  - Trade name: AGITAN® 295

- **1.2 Relevant identified uses of the substance or mixture and uses advised against**
  
  No further relevant information available.

- **Application of the substance / the mixture**
  
  Defoamers, Anti-foaming agent

- **1.3 Details of the supplier of the safety data sheet**

  - **Manufacturer/Supplier:**
    
    MÜNZING CHEMIE GmbH
    
    Münzingstrasse 2
    
    74232 Abstatt, Germany
    
    E-Mail: info@munzing.com
    
    Tel.: +49 7131 987-100

- **Further information obtainable from:**

  - Product Safety Department
  
    E-mail (MSDS): mds@munzing.com

- **1.4 Emergency telephone number:**

  - For Chemical Emergencies: CHEMTREC: +1 703 741 5970

**SECTION 2: Hazards identification**

- **2.1 Classification of the substance or mixture**

  Classification according to Regulation (EC) No 1272/2008
  
  The product is not classified, according to the CLP regulation.

- **2.2 Label elements**

  - Labelling according to Regulation (EC) No 1272/2008 Void
  
    Hazard pictograms: Void

    Signal word: Void

    Hazard statements: Void

- **2.3 Other hazards**

  - Results of PBT and vPvB assessment

    PBT: None.

    vPvB: None.

**SECTION 3: Composition/information on ingredients**

- **3.2 Chemical characterisation: Mixtures**

  Description:

  - hydrocarbons
  - fatty derivates
  - hydrophobic silica
  - emulsiifers

  **Dangerous components:**

  | CAS: 64742-52-5 | Distillates (petroleum), hydrotreated heavy naphthenic | 20-50% |
  | EINECS: 265-155-0 | Asp. Tox. I, H304 |
  | Reg.nr.: 01-2119467170-45 | |

  | CAS: 64742-53-6 | Distillates (petroleum), hydrotreated light naphthenic | 10-20% |
  | EINECS: 265-156-6 | Asp. Tox. I, H304 |
  | Reg.nr.: 01-2119480375-34 | |

(Contd. on page 2)
Trade name: AGITAN® 295

Additional information: For the wording of the listed hazard phrases refer to section 16.

SECTION 4: First aid measures

4.1 Description of first aid measures
- General information: Immediately remove any clothing soiled by the product.
- After inhalation: Supply fresh air; consult doctor in case of complaints.
- After skin contact: Immediately wash with water and soap and rinse thoroughly.
- After eye contact:
  Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor.
- After swallowing: Do not induce vomiting; call for medical help immediately.

4.2 Most important symptoms and effects, both acute and delayed
- No further relevant information available.

4.3 Indication of any immediate medical attention and special treatment needed
- No further relevant information available.

SECTION 5: Firefighting measures

5.1 Extinguishing media
- Suitable extinguishing agents: CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.
- For safety reasons unsuitable extinguishing agents: Water with full jet

5.2 Special hazards arising from the substance or mixture
- In case of fire, the following can be released:
  Carbon monoxide (CO)

5.3 Advice for firefighters
- Protective equipment: Do not inhale explosion gases or combustion gases.
- Additional information
  Dispose of fire debris and contaminated fire fighting water in accordance with official regulations.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures
- Wear protective clothing.
  Particular danger of slipping on leaked/spilled product.

6.2 Environmental precautions:
- Do not allow to enter sewers/ surface or ground water.

6.3 Methods and material for containment and cleaning up:
- Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).

6.4 Reference to other sections
- See Section 7 for information on safe handling.
- See Section 8 for information on personal protection equipment.
- See Section 13 for disposal information.

SECTION 7: Handling and storage

7.1 Precautions for safe handling
- Keep away from heat and direct sunlight.
- Prevent formation of aerosols.

Information about fire - and explosion protection:
- Protect from heat.
- Keep ignition sources away - Do not smoke.
Recommended thickness of the material:

For the mixture of chemicals mentioned below the penetration time has to be at least 480 minutes

Further information about storage conditions:

Additional information about design of technical facilities: No further data; see item 7.

Additional information: The lists valid during the making were used as basis.

8.2 Exposure controls

Personal protective equipment:
General protective and hygienic measures:
The usual precautionary measures are to be adhered to when handling chemicals.
Avoid contact with the eyes and skin.
Respiratory protection: Use suitable respiratory protective device only when aerosol or mist is formed.
Protection of hands:
Only use chemical-protective gloves with CE-labelling of category III.
The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.
Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

Material of gloves
Nitrile rubber, NBR
Recommended thickness of the material: ≥ 0.4 mm
The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material
For the mixture of chemicals mentioned below the penetration time has to be at least 480 minutes (Permeation according to EN 374 Part 3: Level 6).
The determined penetration times according to EN 374 part III are not performed under practical conditions. Therefore a maximum wearing time, which corresponds to 50% of the penetration time, is recommended.
The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

Eye protection: Goggles recommended during refilling

Body protection: Protective work clothing
# SECTION 9: Physical and chemical properties

- **9.1 Information on basic physical and chemical properties**
  - **General Information**
    - **Form:** Fluid
    - **Colour:** Light brown
    - **Odour:** Weak, characteristic
    - **Odour threshold:** Not determined.
  - **pH-value (20 g/l) at 20 °C:** ≈ 6 (DIN ISO 976)
  - **Change in condition**
    - **Melting point/freezing point:** Undetermined.
    - **Initial boiling point and boiling range:** > 180 °C
  - **Flash point:** > 140 °C (DIN EN ISO 2719)
  - **Flammability (solid, gas):** Not applicable.
  - **Decomposition temperature:** Not determined.
  - **Auto-ignition temperature:** Product is not selfigniting.
  - **Explosive properties:** Product is not explosive. However, formation of explosive air/vapour mixtures are possible.
  - **Explosion limits:**
    - **Lower:** ≈ 1 Vol % (01-2119467170-45)
    - **Upper:** ≈ 10 Vol % (01-2119467170-45)
  - **Oxidising properties:** None.
  - **Vapour pressure:** Not determined.
  - **Density at 20 °C:** ≈ 0.95 g/cm³ (DIN EN ISO 2811-1)
  - **Relative density**
    - Not determined.
  - **Vapour density**
    - Not determined.
  - **Evaporation rate**
    - Not determined.
  - **Solubility in / Miscibility with water:** Emulsifiable.
  - **Partition coefficient: n-octanol/water:** Not determined.
  - **Viscosity:**
    - **Dynamic at 20 °C:** ≈ 225 mPas (DIN EN ISO 3219)
    - **Kinematic at 40 °C:** > 20.5 mm²/s (DIN EN ISO 51562)
  - **9.2 Other information**
    - No further relevant information available.

# SECTION 10: Stability and reactivity

- **10.1 Reactivity** No further relevant information available.
- **10.2 Chemical stability**
  - **Thermal decomposition / conditions to be avoided:** No decomposition if used according to specifications.
  - **10.3 Possibility of hazardous reactions** No dangerous reactions known.
  - **10.4 Conditions to avoid** No further relevant information available.
  - **10.5 Incompatible materials** No further relevant information available.
SECTION 11: Toxicological information

- 11.1 Information on toxicological effects
  - Acute toxicity Based on available data, the classification criteria are not met.

| CAS: 64742-52-5 Distillates (petroleum), hydrotreated heavy naphthenic |
|-------------------------|----------------------|
| Oral  | LD50 | >5,000 mg/kg (rat) |
| Dermal | LD50 | >5,000 mg/kg (rabbit) |

| CAS: 64742-53-6 Distillates (petroleum), hydrotreated light naphthenic |
|-------------------------|----------------------|
| Oral  | LD50 | >5,000 mg/kg (rat) |
| Dermal | LD50 | >5,000 mg/kg (rabbit) |

- Primary irritant effect:
  - Skin corrosion/irritation Based on available data, the classification criteria are not met.
  - Serious eye damage/irritation Based on available data, the classification criteria are not met.
  - Respiratory or skin sensitisation Based on available data, the classification criteria are not met.
  - CMR effects (carcinogenicity, mutagenicity and toxicity for reproduction)
    - Germ cell mutagenicity Based on available data, the classification criteria are not met.
    - Carcinogenicity Based on available data, the classification criteria are not met.
  - Reproductive toxicity Based on available data, the classification criteria are not met.
  - STOT-single exposure Based on available data, the classification criteria are not met.
  - STOT-repeated exposure Based on available data, the classification criteria are not met.
  - Aspiration hazard Based on available data, the classification criteria are not met.

SECTION 12: Ecological information

- 12.1 Toxicity
  - Aquatic toxicity:

| CAS: 64742-52-5 Distillates (petroleum), hydrotreated heavy naphthenic |
|-------------------------|----------------------|
| LL50 | >100 mg/l (alga) |
| EL50 | >100 mg/l (fish) |

| CAS: 64742-53-6 Distillates (petroleum), hydrotreated light naphthenic |
|-------------------------|----------------------|
| LL50 | >100 mg/l (alga) |
|     | >100 mg/l (daphnia) |

- 12.2 Persistence and degradability No further relevant information available.
- 12.3 Bioaccumulative potential No further relevant information available.
- 12.4 Mobility in soil No further relevant information available.

Ecotoxicological effects:
- Behaviour in sewage processing plants:
  Inhibition of degradation activity in activated sludge is not to be anticipated during correct introduction of low concentrations. Do not release untreated into natural waters.
- Additional ecological information:
  General notes:
  - Water hazard class 1 (German Regulation) (Self-assessment): slightly hazardous for water
  - Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

- 12.5 Results of PBT and vPvB assessment
  According to Annex XIV of Regulation (EC) No.1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH): The product does not contain a substance fulfilling the
14.1 Waste treatment methods
14.2 UN proper shipping name
14.3 Transport hazard class(es)
14.4 Packing group
14.5 Environmental hazards:
14.6 Special precautions for user
14.7 Transport in bulk according to Annex II of Mariepol and the IBC Code
14.8 Transport/Additional information:
14.9 UN "Model Regulation":

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture
15.2 Chemical safety assessment: A Chemical Safety Assessment has not been carried out.
SECTION 16: Other information

This information is based on our present knowledge. However, this shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

- Relevant phrases
  H304 May be fatal if swallowed and enters airways.
