### SECTION 8: Exposure controls/personal protection

#### Additional information about design of technical facilities
No further data; see item 7.

#### 8.1 Control parameters

| CAS: 64742-56-9 Distillates (petroleum), solvent-dewaxed light paraffinic | ACGIH-TWA Long-term value: 5 mg/m³ mineral oil mist |

**Additional information:** The lists valid during the making were used as basis.

#### 8.2 Exposure controls

- **Personal protective equipment:**

  **General protective and hygienic measures:**
  The usual precautionary measures are to be adhered to when handling chemicals.
  Avoid contact with the eyes and skin.

  **Respiratory protection:**
  Use suitable respiratory protective device only when aerosol or mist is formed.

  **Protection of hands:**
  Oil resistant gloves
  Only use chemical-protective gloves with CE-labelling of category III.
  The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.
  Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

  **Material of gloves**
  Nitrile rubber, NBR
  Recommended thickness of the material: ≥ 0.5 mm
  Neoprene gloves
  The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

  **Penetration time of glove material**
  For the mixture of chemicals mentioned below the penetration time has to be at least 480 minutes (Permeation according to EN 16523-1:2015: Level 6).
  The determined penetration times according to EN 16523-1:2015 are not performed under practical conditions. Therefore a maximum wearing time, which corresponds to 50% of the penetration time, is recommended.
  The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
