  General protective and hygienic measures:
  
  Avoid contact with the eyes and skin.
  
  The usual precautionary measures are to be adhered to when handling chemicals.
  
  Do not inhale dust / smoke / mist.
  
  Respiratory protection:
  
  In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.

  Protection of hands:
  
  Only use chemical-protective gloves with CE-labelling of category III.
  
  The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

  Material of gloves
  
  Nitrile rubber, NBR
  
  Recommended thickness of the material: ≥ 0.4 mm
  
  The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

  Penetration time of glove material
  
  The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
