CERETAN® XT 23599 E

TECHNICAL INFORMATION

Product type: Micronized wax, biopolymer based
Application: Texturing additive for coatings like wood, plastic and metal coating

Properties:
- Texturing
- Haptic effect
- 100% renewable raw material
- Readily biodegradable according to OECD guideline
- Scratch and abrasion resistance
- Matting
- Suited for anti-skid coatings
- Suited for high-temperature applications
- Narrow particle size distribution for a homogeneous texture

Processing Information:
According to the required effect, a dosage of 1-10% is added to the finished formulation.

Technical Data:

<table>

| **Particle size**
| Specified value: | 99% < 120µm |
|             | 50% < 35µm |
| Typical value: | Laser diffraction (ISO 13320) |
| Melting point | Decomposition over 200°C |
| Shelf life   | 24 months |
|              | (Stored in sealed original packing below 35°C) |

*part of certificate of analysis
