DEFROAMER for aqueous systems

Composition: Blend of organo-modified siloxane and polyoxyalkylene technology

Appearance: liquid
Colour: light yellow, cloudy

Typical Properties:
- Active ingredients: approx. 99.0 %
- Consistency: approx. 450 mPas/cps
- Emulsifiable: Moderate

This information is intended as a guideline only and should not be used to issue specifications. Slight deviations do not affect application and capability of the product. For specifications please consult the Certificate of Analysis.

Properties/applications: DEE FO SC-76 is a highly effective siloxane type defoamer suitable for agricultural applications which provides excellent defoaming persistence in grind applications.

Main applications:
- Seed coatings
- Agricultural adjuvants
- 40 CFR 180.910 conforming applications

Recommended levels/use: The properties and performance of a defoamer are greatly dependent upon the specific formulation in which it is utilized and, consequently, should always be tested (possibly at different treatment levels, temperatures, and/or time intervals) to verify performance prior to use. A starting dosage level from 0.1% to 0.5%, based on the weight of the formulation, is recommended.

Storage/handling: Always mix prior to use as the product tends to separate slightly. For better handling, store at between 15°C(59°F) and 25°C(77°F). Mix product and retest for quality after one year from the date of manufacture. The minimum shelf life in closed containers is 12 months from the date of manufacture. Refer to Material Safety Data Sheet for additional handling information.

Packaging: Drums holding 330 lbs/ 150 kg net or 5 gallon pail holding 42 lbs/ 19 kg net.
