TECHNICAL INFORMATION

Defoamer for aqueous systems

Composition: Blend of organo-modified siloxane and synthetic hydrocarbon

Appearance: liquid

Colours: translucent

Typical Properties:
- Consistency: approx. 200 mPas/cps
- Density at 20°C: approx. 7.0 lbs/gal
- Emulsifiable: Not Emulsifiable

This information is intended as a guideline only and should not be used to issue specifications. Slight deviations do not affect application and capability of the product. For specifications please consult the Certificate of Analysis.

Properties/applications: DEE FO XKF-1B is an excellent choice for defoaming a wide variety of high gloss industrial and architectural coating applications.

Main applications:
- Industrial water-based, solvent-based and 100% solids coatings
- High gloss coatings

Recommended levels/use: The properties and performance of a defoamer are greatly dependent upon the specific formulation in which it is utilized and, consequently, should always be tested (possibly at different treatment levels, temperatures, and/or time intervals) to verify performance prior to use. A starting dosage level from 0.2% to 0.5%, based on the weight of the formulation, is recommended.

Storage/handling: Always mix prior to use as the product tends to separate slightly. Mix product and retest for quality after one year from the date of manufacture. The minimum shelf life in closed containers is 12 months from the date of manufacture. Refer to Material Safety Data Sheet for additional handling information.

Packaging: Drums holding 380 lbs/172 kg net or 5 gallon pail holding 35 lbs/16 kg net.
