TECHNICAL INFORMATION

Chemical description: Wax dispersion / Wachsdispersion

Application/properties: Paper coatings
BFR XXXVI conform paraffine emulsion for hydrophobicity
Melting range approx. 65°C
pH-value approx. 7

Processing information: 2 - 10 % of this wax dispersion to be added to the paint or coating while stirring

Solid: microcrystalline Paraffine

Emulsifier-system: non - ionic

Solvent: Water

Technical data:

Storage: In original closed containers lasting at least 12 months at temperatures between 5-35°C. Stir well before use!
Protect from frost! After long storage, particularly after usage of some of the product, evaporation of water is possible and visible signs of particles may be present. We therefore recommend filtration of the product before use.

Our technical suggestions are based on data from many experiments and cannot represent a warranty of any kind as to their performance in other formulations. Customers must always verify our product’s performance in their own systems. This technical data sheet replaces all previous issues.
