LUBA-print 459/H-2

TECHNICAL INFORMATION

Chemical description: Wax dispersion / Wachsdispersion

Application/properties: Waterproofing of surfaces, to improve the depth of colour from marbling effects and smoothing technique (stucco). Drop point approx. 110°C

Processing information: A thin coating should be applied and polished afterwards. The polish ability and the pasty appearance depend on the ambient temperatures. When using lime stucco it is necessary to test the compatibility to avoid changes in colour. Opened product should be processed at once.

Solid: Paraffin combination

Solvent: Isoparaffinic Hydrocarbon (Boiling Range: 153-178°C)/ Water in a ratio 57 : 15
