## TECHNICAL INFORMATION

### Chemical description:
- Wax dispersion / Wachsdispersion

### Application/properties:
- Aqueous lacquers and printing inks, improve the rub resistance

### Processing information:
- 1 - 4 % of this wax dispersion to be added to the lacquer or printing ink while stirring

### Solid:
- Polyethylene-Wax

### Emulsifier-system:
- non - ionic

### Solvent:
- Water

### Technical data:

### Storage:
- In original closed containers lasting at least 12 months at temperatures between 5-35°C. Stir well before use!
- Protect from frost! After long storage, particularly after usage of some of the product, evaporation of water is possible and visible signs of particles may be present. We therefore recommend filtration of the product before use.

---

Our technical suggestions are based on data from many experiments and cannot represent a warranty of any kind as to their performance in other formulations. Customers must always verify our product's performance in their own systems. This technical data sheet replaces all previous issues.
