LUBA-print® T-152/D30

TECHNICAL INFORMATION

Chemical description: Wax dispersion

Application/properties: Solvent-based paints:
- to improve slip property of wood surfaces
- to improve water proofing of wood surfaces
- Temporary corrosion protection for metal surfaces

Processing information: 2 - 6% of this wax dispersion to be added to the lacquer
For temporary corrosion protection the product is applied undiluted

Solid: Functional blend

Solvent: Dearomatized Hydrocarbon (Boiling Range 140 – 170 °C)

Technical data:
