LUBA-print® W 5700

TECHNICAL INFORMATION

Chemical description: Wax dispersion

Application/properties: Aqueous lacquer and paints:
- improve slip property and mar resistance

Aqueous printing inks:
- improve the rub and mar resistance with good gloss stability

Processing information: 1 - 4 % of this wax dispersion to be added to the lacquer or printing ink while stirring

Solid: Polyethylene Wax

Emulsifier-system: non - ionic

Solvent: Water

Storage: In original closed containers lasting at least 12 months at temperatures between 5-35 °C. Stir well before use!
Protect from frost! After long storage, particularly after usage of some of the product, evaporation of water is possible and visible signs of particles may be present. We therefore recommend filtration of the product before use.
